SUMMARY

Senior Frontend Developer with **7+ years of experience** building scalable, high-performance web applications using **React and Next.js**. Proven impact in performance optimisation (reducing render overhead by **40%** and achieving sub-2s load times), test-driven development (**90%+ coverage**), and design-system driven UI development. Strong ownership mindset, accessibility focus (WCAG), and extensive experience mentoring distributed teams

EXPERIENCE

Senior Frontend Developer

Millipixels Interactive (ReachPlc)

August 2024 - Present, WFH

- Maintained a large-scale web application serving thousands of users across three nations and **80+ platforms**, owning the end-to-end frontend development lifecycle.
- Spearheaded performance optimisation by migrating from styled-components to modular CSS, reducing render overhead by **40%** and improving page load speeds to **under 2 seconds**.
- Achieved and maintained **90%+ unit test coverage** using Jest and React Testing Library, implementing TDD and Husky hooks to ensure zero-regression deployments.
- Collaborated with design teams to translate Figma specifications into pixel-perfect, accessible React components (WCAG compliant).
- Led CSS refactoring efforts, addressing specificity issues and removing redundant styles to reduce stylesheet size by **25%**.
- Mentored three junior developers through pair programming and code reviews, improving team velocity by **30%**.

Senior Software Developer (React Consultant)

Quest Global

August 2021 - August 2024, Mumbai (WFH)

- Developed reusable component library with 50+ React components, reducing development time for new features by 35% and ensuring UI consistency across web and KaiOS mobile platforms.
- Optimised API consumption by 30% through Redux state management, request batching, and client-side caching, reducing server load and improving user experience.
- Designed and built three production dashboards from concept to deployment: 2 greenfield projects and one legacy migration, serving 1,000+ daily active users with real-time data visualisation.
- Led migration of legacy dashboard from outdated design system to modern React/Material UI stack, improving performance by 65% and reducing maintenance overhead.
- Built Next.js-based Admin Portal with role-based access control, analytics dashboard, and file management system, enabling internal teams to manage 10,000+ records efficiently.
- Mentored a team of 5 junior developers, knowledge-sharing sessions on React patterns, performance optimisation, and testing strategies across the platforms. Participated in full Agile/Scrum ceremonies, contributing to sprint planning, estimation, and retrospectives while consistently meeting sprint commitments.

Software Developer Front End (UI/UX)

Tata Institute of Social Science, CLIX

January 2019 - July 2021, Mumbai

- Developed and maintained responsive, user-facing web interfaces using **HTML, CSS, Bootstrap 4**, and **JavaScript**, aligning design and technical requirements for optimal web presence and Git for Version control.

- Engineered interactive learning modules using **React**, **Django**, and **jQuery**, implementing content rendering and state management for seamless user experiences.
 - Improved website performance by **60%** through image optimisation, lazy loading, code splitting, and eliminating render-blocking resources, achieving Lighthouse scores above 90.
 - Integrated **REST APIs** and collaborated with back-end teams on **Django** data binding for efficient data handling.
-

PROJECT

YogiMetrics.com

Self • [Yogimetrics.com](#) • November 2025 - December 2025

fastdlcli

Self • [www.npmjs.com/package/fastdlcli](#) • October 2025 - December 2025

EDUCATION

Bachelor of Mechanical Engineering

North Maharashtra University • Jalgaon • 2018 • 6.65

SKILLS

- **Frontend:** React, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, SASS, Styled Components.
 - **State Management:** Redux, Redux Toolkit (RTK), Context API, Zustand.
 - **UI Frameworks:** Material UI, Bootstrap, Tailwind CSS, Ant Design.
 - **Testing:** Jest, React Testing Library, TDD.
 - **APIs:** GraphQL, REST, Axios, React Query.
 - **Tools & DevOps:** Git, Webpack, Vite, Netlify, Vercel, CI/CD, Husky, Jira.
 - **Methodologies:** Agile/Scrum, SOLID Principles, Responsive Design, Accessibility (WCAG).
-
